Brief an advisor on any stock in minutes, not an afternoon

Live quote plus the latest SEC filings, checked and summarized with a citation on every fact.

1 · AI AGENT

Fetch

Calls the quote and SEC EDGAR tools. Retries with backoff. Flags a human after 3 failures.

2 · PLAIN CODE

Validate

Rules check freshness, completeness and error pages. A failure stops the run.

3 · AI AGENT

Summarize

Writes the briefing from the filings only, against fixed criteria, with citations.

4 · PLAIN CODE

Render

Dashboard per ticker with run status, quote, briefing and a follow-up chat.

The problem

Advisors skim 100-page 10-Ks and pull quotes by hand before a client call. It takes 30 to 60 minutes per name, and details slip.

Why you can trust it

- Nothing is summarized until validation passes
- Every fact cites its filing, or says "not in the filings"
- No buy, sell or hold advice
- Every run leaves an audit trail

Next 30 days

- Firm's coverage list, refreshed when filings land
- Earnings call transcripts and 8-Ks
- Scored eval on a 10-question golden set
- Firm market data feed in place of Yahoo
